Healthcare IT Solutions

Hospitals, clinics and Diagnostic centers play a vital role in everybody's life. They strive to improve the quality of patient care by moving healthcare into digital age, handling patient records and tracking treatments electronically. On the other hand, maintaining and monitoring inventory, cash flow is of prime importance. An efficient IS (information system) helps to regulate these activities to attain an effective & efficient management of any healthcare organization.

Advances in automation technologies make possible substantial improvements in getting results to doctors more quickly and deliver better care to their patients. These innovations also improve the precision and reliability of test results, which is another patient safety factor. At Avanttec Medical Systems (P) LTD, we have realized the promise of new technologies by broadly implementing and integrating advanced automation systems.

Today, computerizing your hospital / clinic is not a luxury but it is a necessity. Keeping this in mind, we, at AVANTTEC, bring to you, state of the art iiims® to automate the entire work flow.
